

TYLENOL (ACETAMINOPHEN) DOSING CHART

- Do not give **ANY** fever reducers to infants less than **3 months** of age unless advised by one of our doctors
- Dosage is always based on **WEIGHT** regardless of age
- Use a syringe to properly measure dose rather than a kitchen spoon
- May give Tylenol every **4-6 hours**, not to exceed 5 doses in 24 hours
- Suppositories: Acetaminophen also comes in 80, 120, 325 and 650 mg suppositories. The rectal dose is the same as the dosage given by mouth.
